Guide to update the Report

1. Open a notebook (i.e. Anaconda).

2. Copy the code of the noteebook
   '1_Predicting_Spanish_Football_Games_Full_Code.ipynb'
   From:
   https://github.com/danielgarciasanchez/FDP_Bet_Recommmender

3. Paste the code to your notebook (step1).

4. After running a code an excel file will be generated. Change the last line of code to change the location where the file will be generated.

```
In [126]:  # Exporting the results

           coming_round_all.to_excel('user_report/coming_round_all.xlsx')
```

Download the *'Football_prediction_report.twb'* from
https://github.com/danielgarciasanchez/FDP_Bet_Recommmender
and open it.

5. Link the coming_round table to the file downloaded in the point 4.

6. The Dashboard1&2 are part of the 'user' report and the other parts were part of the drawing of the conclusions.

7. Save the report.
